The Numeral Systems of Nigerian Languages- Ozo-mekuri Ndimele 2016-04-30 The papers in this collection present the numeral systems of more than twenty Nigerian languages. The papers mainly emanate from a workshop on the numeral systems of Nigerian languages organised by the Linguistic Association of Nigeria during its 23rd Annual Conference which was held at the University of Port Harcourt, Nigeria. The workshop arose from awareness created by Dr. Eugene S.L. Chan on the need for Nigerian linguists to document this severely endangered but very important aspect of natural languages. The quantum of mathematical computations - addition, multiplication, subtraction, or a combination of two or all of these - involved in the numeral systems of Nigerian languages is remarkable. The papers reveal that a variety of numeral systems do exist, such as: binary, decimal, incomplete decimal, duodecimal, quinary, quaternary, ternary, mixed, body-part tally systems, and much more. The book is a resource about how different languages manipulate their numeral systems.

Curriculum Renewal for Islamic Education- Nadeem A. Memon 2021-05-11 This book demonstrates why and how it is necessary to redesign Islamic Education curriculum in the K-12 sector globally. From Western public schools that integrate Muslim perspectives to be culturally responsive, to public and private schools in Muslim minority and majority contexts that teach Islamic studies as a core subject or teach from an Islamic perspective, the volume highlights the unique global and sociocultural contexts that support the disparate trajectories of Islamic Education curricula. Divided into three distinct parts, the text discusses current Islamic education curricula and considers new areas for inclusion as part of a general renewal effort that includes developing curricula from an Islamic worldview, and the current aspirations of Islamic education globally. By providing insights on key
concepts related to teaching Islam, case studies of curriculum achievements and pitfalls, and suggested processes and pillars for curriculum development, contributors present possibilities for researchers and educators to think about teaching Islam differently. This text will benefit researchers, doctoral students, and academics in the fields of secondary education, Islamic education, and curriculum studies. Those interested in religious education as well as the sociology and theory of religion more broadly will also enjoy this volume.

Nigerian Art Music - Bode Omojola 2013-04-04 ART MUSIC IN NIGERIA is the most comprehensive book on the works of modern Nigerian composers who have been influenced by European classical music. Relying on over 500 scores, archival materials and interviews with many Nigerian composers, the author traces the historical developments of this new idiom in Nigeria and provides a critical and detailed analysis of certain works. Written in a refreshing and lucid style and amply illustrated with music examples, the book represents a milestone in musicological research in Nigeria. Although written essentially for students and scholars of African music, this interesting book will also be enjoyed by the general reader.

**Unexpected Joy at Dawn**-Alex Agyei-Agyiri 2003 Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularise their stay in the country. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of `alien compliance' issued in 1970-1971, which determined to force all non-ethnic Ghanaians, so called illegal immigrants, to return to their - so stipulated - `home'. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty first century.

**COVID 19 and Migrant Health**-Anish KR COVID 19 impacted the migrant population significantly compared to the general population. The increased vulnerability is due to several factors such as precarious living conditions and working environment; inaccessibility of healthcare services; exclusion of migrants in the pandemic plan of states and countries; mass movement of migrants back to their homes; and loss of employment, and economic impact. Thus, there have been multiple risks attached to labour migration and migrant health during the spread of COVID 19. The book on COVID 19 and Migrant Health is a compilation of papers presented during the National E-conference on Migrant Health and Sustainable Development Goals (SDGs), organized as part of the Indian Council for Social Science Research- Impactful Policy Research in Social Science (ICSSR-IMPRESS) funded project by Rajagiri College of Social Sciences (Autonomous), Kerala. COVID 19 has severe ramifications on the lives of interstate migrant workers in India. The papers included unravels the impacts on livelihood, health, the mental health of the migrant workers. Issues
faced by migrant children, women and men are discussed in different articles. Social Work response to situations caused by COVID 19 is also discussed. Empirical papers on the lives of migrant workers during the COVID 19 pandemic in Delhi, Odisha, Bihar, Kerala and Karnataka form part of different chapters in the book. A global perspective on the right to health of migrant children in COVID 19 is also discussed in one of the chapters. The book is a compilation of information on the health of migrant workers during the COVID 19 pandemic.

Learning by Effective Utilization of Technologies: Facilitating Intercultural Understanding-R. Mizoguchi 2006-11-15 A major theme of this book is the use of computers for supporting collaborative learning. This is not surprising since computer-supported collaborative learning has become both a widespread educational practice and a main domain of research. Moreover, collaborative learning has deep roots in Asian educational traditions. Given the large number of researchers within this field, its scope has become very broad. Under this umbrella, one finds a variety of more specific topics such as: interaction analysis, collaboration scripts (e.g. the Jigsaw script), communities of practice, sociocognitive conflict resolution, cognitive apprenticeship, various tools for argumentation, online discussion or collaborative drawing tools (whiteboards), collaborative writing and the role of facilitators. Most research work on collaborative learning focuses on interactions rather than on the contents of environments, which had been the focus in the previous decades of learning technology research. However, there is no reason to focus on one aspect to the detriment of the other. The editors are pleased that the selected papers also cover multiple issues related to the storage, representation and retrieval of knowledge: ontologies for learning environments and the semantic web, knowledge bases and data mining, meta-data and content management systems, and so forth. This publication also reveals a growing interest for non-verbal educational material, namely pictures and video materials, which are already central to new popular web-based applications. This book includes contributions that bridge both research tracks, the one focusing on interactions and the other on contents: the pedagogical use of digital portfolios, both for promoting individual reflections and for scaffolding group interactions.

**Preparing Teachers** - National Research Council 2010-07-25 Teachers make a difference. The success of any plan for improving educational outcomes depends on the teachers who carry it out and thus on the abilities of those attracted to the field and their preparation. Yet there are many questions about how teachers are being prepared and how they ought to be prepared. Yet, teacher preparation is often treated as an afterthought in discussions of improving the public education system. Preparing Teachers addresses the issue of teacher preparation with specific attention to reading, mathematics, and science. The book evaluates the characteristics of the candidates who enter teacher preparation programs, the sorts of instruction and experiences teacher candidates receive in preparation programs, and the extent that the required instruction and experiences are consistent with converging scientific evidence. Preparing Teachers also identifies a need for a data collection model to
provide valid and reliable information about the content knowledge, pedagogical competence, and effectiveness of graduates from the various kinds of teacher preparation programs. Federal and state policy makers need reliable, outcomes-based information to make sound decisions, and teacher educators need to know how best to contribute to the development of effective teachers. Clearer understanding of the content and character of effective teacher preparation is critical to improving it and to ensuring that the same critiques and questions are not being repeated 10 years from now.

**India: Preparation for the World of Work**-Matthias Pilz 2016-01-27 This book explores how the Indian education and training system prepares young people for the world of work and for the requirements of the employment market – because India is a leading industrialised nation with a very young population and a high demand for a skilled workforce. Indian experts write from a course-specific perspective, offering a comprehensive picture of educational policy, curriculum design and cultural characteristics. The virtual absence of a formalised system of vocational training in India underlines the importance of this research.
