Ethical Argumentation: A Study In Hsun Tzu's Moral Epistemology

Ethical Argumentation - Antonio S. Cua 1985

Ethical Argumentation - Douglas Walton 2009-06 Bridging the gap between applied ethics and ethical theory, Ethical Argumentation draws on recent research in argumentation theory to develop a more realistic model of how ethical justification actually works. Douglas Walton presents a new model of ethical argumentation in which ethical justification is analyzed as a defeasible form of argumentation considered in a balanced dialogue. Walton's new model employs techniques such as: asking the appropriate critical questions, probing accepted values, finding nonexplicit assumptions in an ethical argument, and deconstructing emotive terms and persuasive definitions. This book will be of significant interest to scholars and advanced students in applied ethics and theory.

Human Nature, Ritual, and History - Antonio S. Cua 2005-03-01 In this volume, distinguished philosopher Antonio S. Cua offers a collection of original studies on Xunzi, a leading classical Confucian thinker, and on other aspects of Chinese philosophy.

Pseudepigraphy and Ethical Argument in the Pastoral Epistles - Lewis R. Donelson 2015-09-29 By employing analyses of the literary structure of ancient pseudepigraphical letters and of the logical structure of ethical argument, this study discovers in the Pastoral Epistles a consistent theological ethic that has cosmological and cultic grounding. First, an investigation of Greco-Roman religious pseudepigraphical letters identifies those literary patterns which determine the form of argumentation in the Pastoral Epistles. Second, an investigation of the structure of ethical argument produces categories for organizing and analyzing the apparently disorganized arguments in these letters. Finally, this study concludes that the author of the Pastoral Epistles builds a coherent theological ethic by falsifying Pauline history and by grounding his ethical warrants in church officers.

Morality Play - Jessica Pierce 2013-05-14 Morality Play is an ideal supplement for ethics courses, offering a case study approach that is both flexible and practical. It provides three alternative methods of organization for universal teaching approaches: contemporary moral problems, ethical theories, and moral principles. The introduction illustrates how to effectively use case studies in the classroom and provides a short review of the fundamentals of argumentation and critical thinking. Featuring ten new case studies, the latest edition continues to spotlight some of the most controversial, thought-provoking issues in ethics today. Themes such as crime and punishment, life and death, habitat and humanity, liberty and coercion, and value and culture are made relevant through insightful case studies drawn from newspaper accounts, legal opinions, and other factual sources. The cases present discrete problems designed to make readers examine their abstract notions about morality.

Ethics in Planning - Martin Wachs 2017-07-28 Some planners limit discussions of ethics to simple, though important, questions about the propriety of their daily activities. This approach to ethics restricts discussion of professional ethics to the propriety of everyday social and professional relationships. It ignores the broader ethical content of planning practice, methods, and policies. While narrow definitions of ethical behavior can easily preoccupy public officials and professional associations, they divert attention from more profound moral issues. Martin Wachs argues that ethical issues are implicit in nearly all planning decisions. For illustrative and educational reasons, it is useful to divide ethics in planning into four distinct categories. The first category includes the moral implications of bureaucratic practices and rules of behavior regarding clients and supervisors. The second category includes ethical judgments which planners make in exercising their “administrative discretion.” More complex, and represented by a third category, are the moral implications of methods and the ethical content of criteria built into planning techniques and models. The final type represents the basic choices which society makes - those inherent in the consideration of major policy alternatives. Ethics in Planning contains a variety of representative papers to capture the current state of thinking. This book will be important as a text for survey classes in professional ethics given by university planning programs. It should also supplement short courses in planning ethics for practicing professionals and provide source materials for discussions of planning ethics sponsored by local chapters of the American Planning Association and similar organizations. It gathers together exemplary and critical works, thus it will also interest individual planners in a field that only continues to grow in recognition and importance.

Thinking about International Ethics - Frances Vryling Harbour 1999 In this book Frances Harbour demonstrates through case studies how people with different moral perspectives can approach the problem of international ethics. She introduces political realism and idealism and links them to theories about ethical ends, means, rules and intentions.

Moral Dilemmas and Ethical Reasoning - Carol Harding 2017-07-05 This book deals with moral dilemmas and the development of ethical reasoning in two senses. First, the editor focuses on dilemmas, both real and hypothetical, which require moral judgments. The “Heinz dilemma,” part of Kohlberg's scoring system for level of moral development, is in some cases used as a point of departure for discussion. Problems with this particular dilemma as a scoring item are examined in detail, along with problems generated by similar dilemmas for moral reasoning in everyday life. Those who study moral reasoning and its development are in somewhat of a dilemma as they attempt to integrate information from the domains of philosophy and psychology. These essays investigate domain issues in varied
cultural settings, and across genders and age ranges for what have been proposed as universals in moral judgment, as well as formulate theories that reflect both empirical evidence and logical process. The essays share a conception of human nature as inherently social, as well as a healthy respect for the problems or dilemmas which human sociality carries in its wake. Some of these problems are theoretical, such as those having to do with the moral reasoning or the classic issues of values justification. Other problems are practical, such as those having to do with distributive justice or methods of moral education. This volume will shed light on the process of resolving dilemmas both within philosophy and psychology.

**Epistemological Issues in Classical Chinese Philosophy**

-Hans Lenk 1993-08-03 This book shows that classic Chinese philosophy is as rational as Western approaches dealing with the problems of logic, epistemology, language analysis, and linguistic topics from a philosophical point of view. It presents detailed analyses of rational and methodological features in Confucianism, Taoist philosophy, and the School of Names as well as Mohist approaches in classical Chinese philosophy, especially in regard to ideas of valid knowledge. The authors also provide new arguments against cultural relativism and antirational movements like religious fundamentalism that do not pay due attention to what all human beings have in common[] to cultural universals.

**Moral Boundaries**

-Joan Tronto 2020-07-24 In Moral Boundaries Joan C. Tronto provides one of the most original responses to the controversial questions surrounding women and caring. Tronto demonstrates that feminist thinkers have failed to realise the political context which has shaped their debates about care. It is her belief that care cannot be a useful moral and political concept until its traditional and ideological associations as a “women’s morality” are challenged. Moral Boundaries contests the association of care with women as empirically and historically inaccurate, as well as politically unwise. In our society, members of unprivileged groups such as the working classes and people of color also do disproportionate amounts of caring. Tronto presents care as one of the central activities of human life and illustrates the ways in which society degrades the importance of caring in order to maintain the power of those who are privileged.

**Ethical Argument**

-Hugh Mercer Curtler 2004 This short introduction to ethics bridges the gap between theory and practice. By combining case studies with discussion of theoretical issues, the text introduces students to the most important ethical concepts. The book is an introductory volume for undergraduate students.

**Ethics**

-Stephen Everson 1998-05-04 This collection of essays provides a sophisticated and accessible introduction to the moral theories of the ancient world. It covers the ethical theories of all the major philosophers and schools from the earliest times to the Hellenistic philosophers. A substantial introduction considers the question of what is distinctive about ancient ethics.

**Ethical Challenges in Genomics Research**

-Paula Boddington 2012-03-12 New developments in science and technology have resulted in shifting ethical challenges in many areas including in genomics research. This book enables those who are involved in genomics research, whether as researcher, participant or policy maker, to understand the ethical issues currently developing in this field and to participate actively in these important debates. A clear account is given of how science and technology are outstripping the capacity of previous ethical regulations to cope with current issues, together with practical illustrations of possible ways forward. Key ethical ideas are presented, drawing on the history of research regulation and on an account of the particular challenges arising in the field of genomics. The book uses a grounded, practical approach to explaining ethical concepts and issues which is geared to enhancing interdisciplinary dialogue. Its broad approach to ethical issues includes relevant considerations from social psychology and there is a particular emphasis on understanding the problems of ethical regulations and practice in the institutional and social context of research. A glossary and numerous text boxes explaining relevant terms and key ideas help to make the work an invaluable resource for both beginners and experts in the field.

**The Grounds of Ethical Judgement**

-Christian Illies 2003 Transcendental arguments have gained a lot of attention since the 1990s, mainly in the field of theoretical reason. Christian Illies argues that transcendental arguments have great potential in ethics, as they promise rational justification of normative judgements.

**Confucian Studies**

-Xinzhong Yao 2011 While having substantially declined in political and social influence, Confucianism was revived by leading intellectuals (so-called Modern New Confucians) in the twentieth century to deal with perennial problems facing modern people and society. It is against this background that Confucian Studies has become an increasingly important subject taught in universities and colleges in North America, Europe, East Asia, and Australia. With more and more universities and colleges offering courses on or relating to Confucian philosophy, ethics, religion, and politics, this new collection from Routledge answers the urgent need for a source book in contemporary Confucian Studies.

**Law and Morality in Ancient China**

-R. P. Peerenboom 1995-01-01 Huang-Lao thought, a unique and sophisticated political philosophy which combines elements of Daoism and Legalism, dominated the intellectual life of late Warring States and Early Han China, providing the ideological foundation for post-Qin reforms. In the absence of extant texts, however, scholars of classical Chinese philosophy remained in the dark about this important school for over 2000 years. Finally, in 1973, archaeologists unearthed four ancient silk scrolls: the Silk Manuscripts of Huang-Lao. This work is the first detailed, book-length treatment in English of these lost treasures.
Arguments and Analysis in Bioethics- 2010-01-01 Is there any justification for the common practice of allocating expensive medical resources to rescue a few from rare diseases, when those resources could be used to treat devastating diseases that affect the many? Does the use of Prozac and other anti-depressants make us inauthentic beings? Is it immoral and irrational to have children? What is the force of examples and counterexamples in bioethics? What are the relevance of moral intuition and the role of empirical evidence in bioethical argument? What notion of “function” underlies accounts of the distinction between normality and disease and between therapy and enhancement? Is there an inherent conflict between research aimed at therapy and research aimed at gaining knowledge, such that the very notion of “therapeutic research” is an oxymoron? The twenty-one chapters in this volume strive, through the use of high quality argument and analysis, to get a good deal clearer concerning a range of issues in bioethics, and a range of issues about bioethics. The essays are provocative, indeed, some quite radical and disturbing, as they call into question many common methodological and substantive assumptions in bioethics.

Ethical Considerations When Preparing a Clinical Research Protocol-Evan DeRenzo 2020-07-10 Ethical Considerations When Preparing a Clinical Research Protocol, Second Edition, provides a foundation for improving skills in the understanding of ethical requirements in the design and conduct of clinical research. It includes practical information on ethical principles in clinical research, how to design appropriate research studies, how to consent and assent documents, how to get protocols approved, special populations, confidentiality issues, and the reporting of adverse events. The book’s valuable appendix includes a listing of web resources about research ethics, along with a glossary, making it an invaluable resource for scientists collaborating in clinical trials, physician investigators, clinical research fellows, and more. Walks investigators and trainees through the identification of the ethical aspects of each section of a clinical research protocol. Includes case histories that illustrate key points. Contains information on conducting clinical research within the pharmaceutical industry. Includes internet resources and worldwide web addresses for important research ethics documents and regulations. Contains a chapter on Study Design and Methodology that is purposely expanded to explicitly address biostatistical considerations.

Argument and Change in World Politics-Neta C. Crawford 2002-07-25 Arguments have consequences in world politics that are as real as the military forces of states or the balance of power among them. Neta Crawford reveals how ethical arguments, not power politics or economics, explain decolonization, the greatest change in world politics to occur over the last five hundred years. The book also analyzes how argument might be used to remake contemporary world politics, suggesting how such arguments apply to the issue of humanitarian intervention.

Argumentation and Debate-Austin J. Freeley 2013-01-01 Widely praised, ARGUMENTATION AND DEBATE, 13E, uses a clear, concise, and engaging presentation that makes even complex material easy for students to understand. The authors have adapted the text over the years to match changing practices in debate and teaching while preserving classical and conventional approaches to learning debate. This edition retains its rhetorical roots with a flexible tone open to a diverse array of debate styles that is appropriate in the contemporary context. It values the importance of inclusion and sensitivity to differences of culture, gender, orientation, class and other factors as they impact communicative choices and argumentation. The authors have a preference for team topic evidence-based policy debate; however, the text strives to offer viable tools for a wide range of readers interested in improving their critical thinking for reasoned decision making. Moral Vision and Tradition-Antonio S. Cua 2018-03-02 This volume offers a comprehensive philosophical study of Confucian ethics—its basic insights and its relevance to contemporary Western moral philosophy. Distinguished writer and philosopher A. S. Cua presents fourteen essays which deal with various probl

Chinese-Dutch Business Negotiations-Xiangling Li 1999 The Chinese are known as an inscrutable people in the West. With the rapid globalization of world business, China, with its booming economy and as one of the world’s largest emerging markets, is attracting increasing numbers of international traders and investors. Various sources have shown that language and culture are, among other factors, two of the major obstacles to successful business collaborations between the Chinese and Westerners. This dissertation aims to help remove these obstacles by offering some insights into the intricate mechanisms of business negotiation between the Chinese and the Dutch. While most of the research concerning Chinese-Western communication has used everyday conversation as the subject of study, this research chooses negotiation, the core of international business, as its subject. Micro-level qualitative discourse analyses are used as the main research method in addition to ethnographic methods such as the questionnaire survey and interview. The main data used are simulated as well as real-life video-taped Chinese-Dutch business negotiations. Questionnaire survey and interview data from real-life Chinese and Dutch negotiators are used as support data. The phenomena recurrently cropping up across the negotiations are examined at a turn-to-turn level to pinpoint places where problems arise that prevent the negotiators from reaching mutual understandings and fulfilling negotiation goals. The deep-rooted cultural concepts underlying the linguistic phenomena prove to be the main trouble sources. The results of this research are relevant for both the academic and business world.

Global Issues and Ethical Considerations in Human Enhancement Technologies-Thompson, Steven John 2014-04-30 With rapid advancements in human enhancement technologies, society struggles with many issues, such as definition, effects, participation,
regulation, and control. Current and future initiatives in these technologies may not be in the participants’ best interests; therefore, it is imperative for research on humanitarian considerations to be available to those affiliated with this field. Global Issues and Ethical Considerations in Human Enhancement Technologies compiles prestigious research and provides a well-rounded composite of the field’s role in emerging technologies. Addressing both present and future concerns, this publication serves as a valuable reference work for researchers, students, professionals, and practitioners involved in computer science and the humanities, as well as many engaged in a humanities approach to metasystems, new artificial life, and robotics.

**Case Studies in Organizational Communication: Ethical Perspectives and Practices** by Steve Kent May 2012-01-20 The Second Edition of Case Studies in Organizational Communication: Ethical Perspectives and Practices, by Dr. Steve May, integrates ethical theory and practice to help strengthen readers’ awareness, judgment, and action in organizations by exploring ethical dilemmas in a diverse range of well-known business cases.

**Ethical Issues and Guidelines in Psychology** by Philip Banyard 2006-04-07 How do we know right from wrong, good from bad, help from hindrance, and how can we judge the behavior of others? Ethics are the rules and guidelines that we use to make such judgements. Often there are no clear answers, which make this subject both interesting and potentially frustrating. In this book the authors offer readers the opportunity to develop and express their own opinions in relation to ethics in psychology. There are a number of famous many psychological studies that appear to have been harmful or cruel to the people or animals who took part in them. For example, memory researchers carried out studies on a man who had no memory for over forty years, but because he had no memory, he was never able to agree to the studies. Is this a reasonable thing to do to someone? Comparative psychologist Harry Harlow found that he could create severe and lasting distress in monkeys by keeping them in social isolation. Is this a reasonable thing to do even if we find out useful things about human distress? If you were able to use psychological techniques to break someone down so that they revealed information that was useful to your government would you do it? If so, why, and if not, why not? These ethical issues are not easy to resolve and the debates continue as we encounter new dilemmas. The book uses many examples of psychological research to look at key ethical issues ethical guidelines of psychologists socially sensitive research ethics in applied psychology the use of animals in research. This book will be essential reading for and undergraduate and pre-undergraduate students studying psychology and students of other subjects concerned with ethics.

**Studies in the History of Political Philosophy Before and After Rousseau** by Charles Edwyn Vaughan 1925

**Foundations of Information Ethics** by John T. F. Burgess 2019-07-03 Foreword by Robert Hauptman As discussions about the roles played by information in economic, political, and social arenas continue to evolve, the need for an intellectual primer on information ethics that also functions as a solid working casebook for LIS students and professionals has never been more urgent. This text, written by a stellar group of ethics scholars and contributors from around the globe, expertly fills that need. Organized into twelve chapters, making it ideal for use by instructors, this volume from editors Burgess and Knox thoroughly covers principles and concepts in information ethics, as well as the history of ethics in the information professions, examines human rights, information access, privacy, discourse, intellectual property, censorship, data and cybersecurity ethics, intercultural information ethics, and global digital citizenship and responsibility; synthesizes the philosophical underpinnings of these key subjects with abundant primary source material to provide historical context along with timely and relevant case studies; features contributions from John M. Budd, Paul T. Jaeger, Rachel Fischer, Margaret Zimmerman, Kathrine A. Henderson, Peter Darch, Michael Zimmer, and Masooda Bashir, among others; and offers a special concluding chapter by Amelia Gibson that explores emerging issues in information ethics, including discussions ranging from the ethics of social media and social movements to Al decision making. This important survey will be a key text for LIS students and an essential reference work for practitioners.

**The Ethics of Cultural Studies** by Joanna Zylinska 2005-04-15 Ethical questions feature prominently on today’s cultural and political agendas. The Ethics of Cultural Studies presents an ethical manifesto for Cultural Studies, an exploration of its current ethical and political concerns, and of its future challenges. The book is concerned with ethics in the material world, and draws on examples as diverse as cloning and genetics, asylum and immigration, experiments in plastic surgery and in electronic and digital art, memories of the Holocaust, September 11th, and media representations of violence and crime. The Ethics of Cultural Studies is a groundbreaking intervention that sets the debate on ethics in cultural study, and offers an invaluable source of ideas for students of contemporary culture.

**How Master Mou Removes Our Doubts** by John P. Keenan 1994-01-01 This is the first English translation of the earliest Chinese Buddhist text, but it is more than a translation. Keenan shows that Mou-tzu’s Treatise on Alleviating Doubt is a Buddhist hermeneutic on the Chinese classics. Using a reader-response method of examining the text, Keenan shows how the rhetoric convinces readers that one can remain culturally Chinese yet be a Buddhist. The Introduction explains the reader-response methodology, develops the movement of the dialogue in terms of this method, and clarifies the rhetorical impact of Master Mou’s argument. The Introduction is followed by the thirty-seven articles of the text. Each article is first translated into English, then the contextual images and ideas are unpacked for each, and finally each article is subjected to a reader-response critique that shows what the argument accomplishes in each of its progressive steps.

**Journal of Chinese Studies** 1985

**Ethical Argumentation A Study In Hsun Tzus Moral Epistemology**
Ethical Problems in Clinical Practice - Søren Holm 1997 This new study provides a thorough analysis of the ethical reasoning of doctors and nurses. Based on extensive interviews, Søren Holm's work demonstrates how qualitative research methods can be used to study ethical reasoning, and that the results of such studies are important for normative ethics, that is, the analysis of how health care professionals ought to act.

Boston Confucianism - Robert C. Neville 2000-09-28 Argues that Confucianism can be important to the contemporary, global conversation of philosophy and should not be confined to an East Asian context.

All Under Heaven - John H. Berthrong 1994-01-01 This book is a study of comparative philosophy and theology. The themes are the critical issues arising from the modern interpretation of Confucian doctrine as they confront the Christian beliefs of the nineteenth and twentieth centuries.

Michigan Mute Swans - Corey A. Jager 2013

The Ethical Challenges of Human Research - Franklin G. Miller 2012-11-15 This book contains 22 essays on the ethics of research involving human subjects written over a 15-year period. Topics addressed include the ethics of clinical trials, controversial study designs, and informed consent.

History of the Language Sciences / Geschichte der Sprachwissenschaften / Histoire des sciences du langage. 1. Teilband - Sylvain Auroux 2000-01-01 Writing in English, German, or French, more than 300 authors provide a historical description of the beginnings and of the early and subsequent development of thinking about language and languages within the relevant historical context. The gradually emerging institutions concerned with the study, organisation, documentation, and distribution are considered as well as those dealing with the utilisation of language related knowledge. Special emphasis has been placed on related disciplines, such as rhetoric, the philosophy of language, cognitive psychology, logic and neurological science.

Guodian - Kenneth Holloway 2009-01-28 Fourteen years ago, a corpus of bamboo-strip texts was found in a late-fourth-century-BCE tomb at Jingmen, Hubei province in central China. The discovery of the "Guodian" texts, together with other recently discovered Warring States manuscripts, has revolutionized the study of early Chinese intellectual history. Kenneth Holloway argues that the Guodian corpus puts forth a political philosophy based on the harmonious interconnection of individuals engaged in moral self cultivation. This unique worldview, says Holloway, cannot meaningfully be categorized as "Confucian" or "Daoist," because it shares important concepts and vocabulary with a number of different textual traditions that have anachronistically been characterized as competing or incompatible "schools" of thought. He finds that within the Guodian corpus familiar philosophical concepts and texts are applied in distinctive ways, presenting a worldview that is quite different from the received textual traditions. In addition to contributing to our understanding of this particular body of texts, Holloway proposes a methodology for assessing a corpus of texts without relying on assumptions and definitions that derive from two millennia of scholarship.

Meeting the Ethical Challenges of Leadership - Craig E. Johnson 2017-01-10 Ethics is at the heart of leadership. All leaders assume ethical burdens and must make every effort to make informed ethical decisions and foster ethical behavior among followers. The Sixth Edition of Meeting the Ethical Challenges of Leadership: Casting Light or Shadow explores the ethical demands of leadership and the dark side of leadership. Author Craig E. Johnson takes a multidisciplinary approach to leadership ethics, drawing from many fields of research to help readers make moral decisions, lead in a moral manner, and create an ethical culture. Packed with real-world case studies, examples, self-assessments, and applications, this fully-updated new edition is designed to increase students' ethical competence and leadership abilities.
